Containerization: <https://www.google.com/search?q=free+course+for+Containerization>

3. Agile Methodologies (e.g., Scrum, Kanban)

Agile Methodologies: <https://www.google.com/search?q=free+course+for+Agile+Methodologies>

1 Project Idea:

Title: Personalized Health and Wellness Platform

Description: Develop a web-based platform that integrates machine learning algorithms to provide personalized health and wellness recommendations to users based on their lifestyle, diet, and physical activity. The platform should include features such as:

- User profiling and data analysis
- Customized health and wellness plans
- Integration with wearable devices and health apps
- Real-time tracking and monitoring of user progress
- Personalized coaching and support

Technologies: Python, Flask, TensorFlow, MySQL, HTML, CSS, and relevant libraries and frameworks.

ENGINEERING ACTION PLAN

Review the Match Score above. If below 80, prioritize the 'Missing Skills' section and complete the suggested project to

strengthen your resume.
