2. Agile Methodologies (e.g., Scrum, Kanban)

Agile Methodologies: <https://www.google.com/search?q=free+course+for+Agile+Methodologies>

3. Version Control Systems (e.g., Git, SVN)

Version Control Systems: <https://www.google.com/search?q=free+course+for+Version+Control+Systems>

1 Project Idea:

Title: Smart Home Automation System

Description: Develop a full-stack web application that integrates with IoT devices to control and monitor home appliances remotely. The system should include features such as user authentication, device management, and automation rules. Technologies to be used: Python, Flask, MySQL, HTML, CSS, and IoT frameworks like Home Assistant or OpenHAB.

ENGINEERING ACTION PLAN

Review the Match Score above. If below 80, prioritize the 'Missing Skills' section and complete the suggested project to strengthen your resume.
